## PROFESSIONAL SUMMARY

Product Engineer with 12+ years full-stack experience in React, React Native, TypeScript, Node.js, and Ruby on Rails, proven in leading 0-to-1 mobile and web products serving 7M+ users by collaborating with design, conducting user research, and iterating on feedback. Identified multi-million-dollar revenue gaps through data-driven analysis and optimized onboarding flows based on field research. Skilled technical writer and stakeholder communicator driving ongoing product success. Enjoy speaking directly with customers and understanding their problems. Care more about outcomes and impact than the exact implementation, or the tools used to solve the problem.

## TECHNICAL SKILLS

- **Mobile & Frontend:** React Native, Expo, React, TypeScript, JavaScript, iOS, Android, Windows, UI/UX Design, Accessibility, Performance Optimization, Microfrontends
- **Backend & APIs:** Node.js, GraphQL, REST API Development, Ruby on Rails, Go, AWS, PostgreSQL, SQLite, Microservices, Python
- **DevOps & Quality:** CI/CD (GitHub Actions), Jest, Detox, Maestro E2E Testing, Git (Version Control), Feature Flags, Staged Rollouts, Security Best Practices
- **Product & Data:** A/B Testing, Experimentation, Data Analysis, Analytics Pipelines, Tableau, User Experience Research, HIPAA Compliance, AI Integration
- **Process & Leadership:** Agile/Scrum, Stakeholder Management, Technical Documentation, Code Review, System Design, Scalability, Project Management, Technical Writing, Mentorship, Full-stack Experience

## PROFESSIONAL EXPERIENCE

### Allergan Data Labs | *Staff Software Engineer*

May 2023 - Present

- Identified a neglected revenue funnel in a 7M+ MAU B2C loyalty app using React, SQL, and Mixpanel analytics, created a measurement framework, presented the business case to executives, and secured dedicated headcount-resulting in a multi-million-dollar annualized recovery
- Spearheaded the Refer a Friend feature from concept to launch: partnered with product and design, integrated AI-driven referral suggestions, mentored 2 engineers through the project, and achieved a 15% increase in referral-driven signups within the first quarter
- Reduced app startup time by 30% through TTI optimization and revamped the authentication flow to remove 3 common user drop-off points, improving session completion rates for 7M+ monthly users.
- Introduced Maestro E2E testing across 3 squads (12+ engineers), cutting regression-related hotfixes by 40%; authored technical documentation for the organization's first automated release validation pipeline.
- Championed DevOps practices-including CI/CD pipeline optimization with GitHub Actions, staged rollouts, and feature-flag workflows-and formalized code-review standards adopted across the mobile platform team, which accelerated release cycles and raised code-quality standards

### Point Inside | *Lead Software Engineer*

Jul 2022 - Dec 2022

- Audited a 30K+ line React Native codebase; identified 12 structural issues and secured stakeholder alignment on a phased improvement roadmap using Agile/Scrum sprint planning
- Created a 30+ component design system from scratch, reducing UI inconsistencies by 60% and cutting new feature development time by an estimated 25%.
- Conducted 4 training sessions on React performance patterns and modern state management; produced technical documentation and runbooks for the team's mobile development workflow, which shortened onboarding time for new engineers by about 20%
- Improved CI/CD pipeline speed by 35% through parallelized test execution and optimized version control branching strategy, enhancing full-stack release efficiency

### Sunroom | *Senior Software Engineer*

Dec 2021 - Jul 2022

- Resolved critical video playback performance bottlenecks in a pre-launch creator app; delivered the App Store release within 2 months, enabling the company's first public launch.
- Planned analytics pipelines in Tableau tracking 15+ user behavior metrics; executed A/B experiments that informed product pivots and increased creator engagement by 20%.
- Mentored 1 junior engineer from onboarding to independent contributor within 6 weeks while personally shipping 2-3 features per week across the full stack.
- Flagged retention risks for 2 key teammates to the CEO; proposed workload redistribution that helped retain both engineers through a critical growth phase.

### Uniform Teeth | *Founding / Lead Software Engineer*

May 2019 - Feb 2022

- Architected and launched the patient-facing React Native app as the founding mobile engineer, overseeing the full software development life cycle-from requirements through CI/CD, App Store publishing, and Apple review negotiations-across eight release cycles, which accelerated feature delivery and boosted patient satisfaction. Used Go and Python to develop missing API endpoints.
- Traveled to San Francisco to conduct field user research at 2 clinics; observed 10+ patients struggling with onboarding, then restructured the flow from 10 screens to 3 - eliminating manual data entry by clinic staff and increasing patient self-completion rates.
- Maintained HIPAA compliance and security standards throughout all releases, and contributed 15+ pull requests to the Ruby on Rails API and Go microservices, which improved system reliability and supported scalability when backend capacity was constrained
- Authored API documentation and operational runbooks for the mobile release process, standardizing procedures for the 4-person engineering team.

#### **Axxy | *Senior Software Engineer***

**Jul 2015 - May 2019**

- Pioneered React Native adoption and migrated two native iOS and Android apps to a unified React Native codebase, documenting the process, leading workshops, and pair-programming with 20 engineers; this reduced mobile code-maintenance effort by roughly 30 % and accelerated feature delivery
- Engineered a cross-platform field-service application using React Native, TypeScript, and Node.js that ran on iOS, Android, Windows, and Web, enabling white-label customization for more than five enterprise clients from a single scalable codebase; this cut client onboarding time by half
- Implemented Salesforce Flow engine support within the mobile app and developed a real-time Salesforce-powered chat system handling 1,000+ daily interactions for field service teams.
- Served as the primary engineer for CEO demos, rapidly prototyping happy-path features in React Native within five business days, directly supporting three major contract wins
- Contributed code and documentation to the react-native-windows open-source project, adding Windows deployment support that enabled the company to launch the field-service app on Windows devices for all enterprise clients, expanding platform coverage

#### **Perfectionist Media | *Lead Engineer***

**Feb 2014 - Jul 2015**

Optimized a Ruby on Rails application, achieving 90% page load time reduction (from 8s to under 1s) through database query tuning and caching strategies serving 2,000+ daily active users.

#### **Unteleported | *Web Developer***

**Mar 2013 - Dec 2014**

First professional role; developed 1 banking portal, 2 education platforms, and an inventory management system for 4 enterprise clients. Adopted TDD practices and Ember.js.

#### **Freelance | *Freelance / Contract***

**Mar 2014 - Jul 2014**

Revamped an NGO flood-tracking website and delivered companion mobile apps using Expo and Expo Router (single codebase for iOS, Android, and Web), completing the full project in 3 months with 500+ monthly active users.

### **PROJECTS & SPEAKING**

#### **WithinBudget | WithinBudget**

- Independently planned, developed, and launched a performance-first personal finance tracker (React Native, Expo) with sub-100ms interaction times.
- Leveraged AI-assisted development workflow; published to App Store with 4.8-star initial rating.

#### **How Not to Lose Developer | Speaker | *WAWTech 2025***

- Exhibited practical AI adoption strategies to 100+ attendees in "How Not to Lose Developer Skills in the AI Era" covering engineering judgment and responsible AI tool integration.

### **CERTIFICATIONS & TRAINING**

- HIPAA Compliance Training
- React Native Advanced Patterns
- Agile/Scrum Practitioner
- AWS Cloud Fundamentals

### **EDUCATION**

**Taras Shevchenko National University of Kyiv | *M.S., High Technologies***

**2013 - 2015**

**Taras Shevchenko National University of Kyiv | *B.S., Applied Physics***

**2008 - 2013**
